MongoDB

## PROFILE

As a full-stack developer, I deeply resonate with Antoine de Saint-Exupéry's wisdom: **"Perfection is achieved when there is nothing left to take away"**. I apply this philosophy to my work, aiming to create intuitive and elegant solutions that look simple, yet perform beautifully.

## EMPLOYMENT HISTORY

Senior Web Developer, Pearson

Raleigh-Durham

2013 — Present

Current main responsibilities: Translate FIGMA designs into working prototypes. Work with the Design team other developers to integrate front-end and back-end code. Troubleshoot layout and usability issues across a variety of mobile devices and browsers. Manage interns and their projects. Support Junior Developers.

Senior Web Designer, Pearson -  
Pearsonschool.com

Chandler

2009 — 2013

Some of responsibilities in this position were to design and code product awareness pages and support the sales force by creating HTML emails and landing pages for events like webinars and conferences. I also supported Regional Marketing Specialists by designing collateral pieces like product brochures and posters.

Web Developer, Locallife

Scottsdale

2008 — 2009

During my time with locallife.com in Scottsdale, some of my duties were to design and create stylish websites by hand coding HTML, CSS, JS and some ASP, design marketing collateral and customer support when needed.
